Three columns
simultaneously!

AcceCLEAN automatically cleans up your samples with immunoaffinity columns

Using the LCTech robotic system AcceCLEAN you can clean up various crude extracts via immunoaffinity columns - three columns simultaneously and up to 30 samples in one run.

That's how you simplify and accelerate sample preparation for your analysis of mycotoxins in food and feed.

The three most convincing advantages:

- ▶ AcceCLEAN autonomously operates **three columns simultaneously** and **enhances your sample throughput**.
- ▶ This automation stabilizes comparability at a high stage: AcceCLEAN shows **no cross-contamination** from sample to sample, but **excellent and reliable recoveries**.
- ▶ You can purchase AcceCLEAN **at an affordable and fair price**.

Do you want to gather more information? Have a look at www.Lctech.de/e/AcceCLEAN or use the contact form at the backside of this letter!

Yours sincerely!

Rita Rott, Marketing

...and 30
in one run!

Your request to LCTech

Do you want to know more about how to automatically handle immunoaffinity columns with the robotic system AcceCLEAN?

We are here to answer your questions or to send you a non-binding quotation!

Please fill in this form and simply send it back to us:

mail to: LCTech, Rita Rott, Bahnweg 41, 84405 Dorfen, Germany

fax to: ++49 (0)8081 / 9368-10

You can of course also send a simple message via e-mail to rott@Lctech.de.
