Artificial Body Fluids

Pickering Test Solutions

Artificial Body Fluids for Product Testing

Pickering Laboratories Artificial Body Fluids Products are used worldwide for product testing and research applications. They are made to official product testing specifications from ANSI, NIST and other official standards organizations. The GMP compliant manufacture process of Pickering enables excellent batch reproducibility and precise matching of official formulations.

Custom formulations to accommodate specific pH or ingredient requirements are also available upon request.

Applications

We are offering testing solutions for:

- Personal and wearable electronics
- Watch-cases and accessories
- Colorfastness to light for fabric
- Colorfastness to perspiration for leather
- Sweat for Ophthalmic optics
- Dental metal alloys.
- Colorfastness of products taken orally
