Immunoaffinity and Clean-up Columns

Ochratoxin A

Ochratoxin A

MYCOTOXINS

About Ochratoxin A

Ochratoxin A is a naturally occurring mycotoxin, which is highly toxic for humans and animals. Ochratoxin a is produced by various *Aspergillus* and *Penicillium* species as primary contaminant in various food and feed stuffs.

Especially for the purification of ochratoxin A in food and feed, LCTech developed the immunoaffinity columns [OtaCLEAN](#) and [OtaCLEAN SMART](#). The columns guarantee best results even at difficult matrices.

The columns possess a very high matrix tolerance and are able to bind ochratoxin A highly specific. The columns are suitable for the manual processing and for fully automated processing.

Sample Preparation and Analysis

Precise, simple and fast with LCTech products. In our mycotoxin brochure you find everything about mycotoxins.
